MEDICAL RECORDS REVIEW
STANDARD OPERATING PROCEDURE (SOP)

End-to-End Client Acquisition, Case Processing, Review, Delivery, Feedback, Invoicing & Closure

Document Owner	Medical Records Review Operations
Document Status	Operational SOP / Controlled Document
Version	1.0
Effective Date	09 August 2026
Review Cycle	Annual or when the workflow changes

Purpose: To establish a consistent, auditable workflow for receiving, processing, reviewing, quality-checking, delivering, invoicing and closing medical records review cases.

1. PROFESSIONAL PROCESS FLOWCHART

Standard case journey from initial client contact through final closure.

Control point: No case should move to active processing until the required client approval has been received and documented.

2. SOP PURPOSE & SCOPE

This SOP defines the standard operating process for medical records review engagements, including client acquisition, record intake, authorization/approval, case assignment, processing, quality review, final audit, delivery, follow-up, invoicing, payment tracking and case closure.

Scope: Applies to all staff involved in client communication, records intake, case coordination, medical records processing/review, quality control, delivery and billing.

3. ROLES & RESPONSIBILITIES

Role	Primary Responsibility
Client / Requestor	Provides required records, information and approval; reviews delivered work and provides feedback; completes payment.
Case Coordinator / Operations	Handles client communication, intake acknowledgement, approval tracking, case creation, assignment, status tracking and delivery coordination.
Assigned Staff	Processes the medical records review case according to the approved scope and submits the completed work for review.
Reviewer / Senior Reviewer	Performs substantive review, checks quality and confirms the case meets the requested scope before final audit.
Final Auditor / QC	Performs final quality, completeness, formatting and requirement checks before client delivery.
Billing / Accounts	Handles invoice follow-up, payment tracking, reconciliation and financial closure.

4. DETAILED PROCEDURE

01. Client Arrival / Lead Generation

Action	Client enters the workflow through a digital mail campaign, marketing outreach or a direct phone call.
Responsible	Operations / Client Coordinator
Control / Record	Record lead source and client contact details in the designated CRM/case tracker. Avoid duplicate cases.

02. Service Recognition

Action	Explain the medical records review service, scope, expected deliverables and general process. Confirm that the client understands the service.
Responsible	Client Coordinator
Control / Record	Document client interest, requested service and initial case requirements.

03. Agreement to Submit Records

Action	Client agrees to provide the records required for review.
Responsible	Client + Operations
Control / Record	Provide secure submission instructions and clarify required supporting documents.

04. Portal Record Submission

Action	Client uses the secure portal to upload/submits the medical records and relevant case information.
Responsible	Client / Operations

Control / Record	Confirm records are accessible, identifiable and associated with the correct case.

05. Record Submission Acknowledgement

Action	Send acknowledgement confirming receipt of submitted records.
Responsible	Operations
Control / Record	Log date/time of receipt and identify missing, unreadable or incomplete records.

06. Client Approval to Proceed

Action	Obtain required client approval before active case processing begins.
Responsible	Operations + Client
Control / Record	Approval must be documented. If approval is not received, place the case on hold.

07. Case Assignment

Action	Assign the approved case to concerned staff based on workload, expertise and case requirements.
Responsible	Operations / Case Coordinator
Control / Record	Record assignee, assignment date, scope and target completion date.

08. Staff Acknowledgement

Action	Assigned staff confirms receipt and understanding of the case.
Responsible	Assigned Staff
Control / Record	Identify missing information, clarification requirements or issues requiring escalation.

09. Case Processing

Action	Assigned staff reviews/processes medical records according to the approved scope and prepares the requested deliverable.
Responsible	Assigned Staff
Control / Record	Maintain organized working files and document material issues or clarifications.

10. Reviewer Review

Action	Completed case is submitted to the designated reviewer for substantive review.
Responsible	Reviewer
Control / Record	Check accuracy, completeness, logic, formatting and alignment with the client's requested scope.

11. Final Audit / Quality Control

Action	Final audit is performed before release to the client.
Responsible	Final Auditor / QC
Control / Record	Verify final file, client/case identifier, requested deliverables, completeness, formatting and approval status.

12. Case Delivery

Action	Final case is delivered to the respective client using the standard delivery email template.
Responsible	Operations / Delivery Team

Control / Record	Record delivery date/time, recipient and final version delivered.

13. One-Week Follow-Up

Action	Approximately one week after delivery, contact the client for feedback and follow up on invoice/payment.
Responsible	Operations / Billing
Control / Record	Document feedback, requested revisions and invoice status. Escalate unresolved issues.

14. Payment

Action	Client completes payment and the transaction is recorded/reconciled.
Responsible	Billing / Accounts
Control / Record	Match payment to invoice/case and update financial status.

15. Case Closure

Action	Once deliverables are accepted and payment is confirmed, formally close the case.
Responsible	Operations
Control / Record	Update case status to Closed and retain required records, approvals, communications, delivery confirmation and payment details according to company policy.

5. STANDARD COMMUNICATION CHECKPOINTS

Use approved company email templates wherever applicable. The wording below provides the standard intent and can be adapted to the specific client/case.

A. Record Submission Acknowledgement

Subject	Medical Records Received – [Case/Client Reference]
Template	Dear [Client Name], We confirm that the medical records submitted through the portal have been received successfully. Our team will review the submission and proceed with the next required step. If any additional information or records are required, we will contact you. Thank you.

B. Approval Request

Subject	Approval Required to Proceed – [Case/Client Reference]
Template	Dear [Client Name], We have completed the initial intake of the submitted records. Please confirm your approval for us to proceed with the medical records review as discussed. Once approval is received, the case will be assigned for processing. Thank you.

C. Staff Assignment Acknowledgement

Subject	Case Assignment Acknowledgement – [Case Reference]
Template	Dear [Staff Name], The above case has been assigned to you for processing. Please acknowledge receipt and advise immediately if there are any missing records, clarification requirements or other issues that may affect completion.

D. Case Delivery

Subject	Completed Medical Records Review – [Case/Client Reference]
Template	Dear [Client Name], Please find the completed medical records review for [Case/Client Reference]. The case has undergone the required review and final quality check prior to delivery. Please review the delivered material and let us know if you have any questions or feedback. Thank you.

E. One-Week Follow-Up / Feedback & Invoice

Subject	Follow-Up – [Case/Client Reference]

Template	Dear [Client Name], We are following up regarding the medical records review delivered on [Delivery Date]. We would appreciate your feedback and confirmation that the deliverable was received and meets your requirements. Please also let us know if you require any clarification regarding the invoice/payment for this case. Thank you.

6. CASE CONTROL CHECKLIST

Stage	Minimum Control / Evidence	Status
Client intake	Client details + lead source recorded	■
Record submission	Records received and linked to correct case	■
Acknowledgement	Receipt acknowledgement sent	■
Approval	Client approval documented	■
Assignment	Assigned staff + assignment date recorded	■
Staff acknowledgement	Assigned staff confirmed receipt	■
Processing	Requested scope completed	■
Reviewer review	Reviewer completed review	■
Final audit	QC/final audit completed	■
Delivery	Final version delivered + delivery recorded	■
Follow-up	Feedback requested approximately one week later	■
Invoice	Invoice issued/followed up	■
Payment	Payment received/reconciled	■
Closure	Case marked Closed + required records retained	■

7. CASE STATUS DEFINITIONS

Status	Meaning
New Lead	Client has entered the workflow but has not yet agreed to submit records.
Records Requested	Client has agreed to submit records; submission is pending.
Records Received	Records have been received and acknowledgement has been sent.
Awaiting Approval	Records are received, but client approval to proceed is pending.
Approved / Assigned	Approval received and case assigned to staff.
In Processing	Assigned staff is actively working on the case.
Under Review	Completed work is with the reviewer.
Final Audit	Case is undergoing final QC before release.
Delivered	Final case has been delivered to the client.
Follow-Up	Client feedback and invoice/payment follow-up is in progress.
Payment Pending	Deliverable is complete; payment remains outstanding.
Closed	Case is completed, payment reconciled, and required records retained.

8. QUALITY & ESCALATION PRINCIPLES

• Do not process a case without the required client approval.

• Any missing, unclear or unreadable record should be flagged before the case is finalized.

• Any scope change requested by the client should be documented and, where applicable, approved before additional work is performed.

• Reviewer and final auditor should be independent quality checkpoints from the staff member who performed the initial processing, wherever staffing permits.

• Only the final approved version should be released to the client.

• All client communications, approvals, delivery confirmations and payment status should be traceable to the case record.

• Cases with unresolved client disputes, major quality concerns or payment exceptions should be escalated to the designated operations/management contact.

> **Important:** This SOP is an operational workflow document. It should be aligned with the organization's contractual requirements, privacy/security procedures, applicable law, records-retention policy and professional standards before formal adoption.
